Professional Summary

Mobile Application Engineer with 3+ years of experience building scalable, production-ready mobile applications using Flutter (Dart) and Native Android (Kotlin). Specialised in fintech, payments, and POS hardware integration — including building native Android SDKs that abstract multiple payment-terminal OEMs (HorizonPay, Topwise, Dspread, Morefun) behind unified APIs for EMV/contactless processing, key injection, and receipt printing. Proven track record shipping apps to the Google Play Store and Apple App Store across fintech, healthcare, e-commerce, and community-management domains. Proficient in modern state management (Bloc/Cubit, Riverpod), Firebase (FCM), payment and identity verification APIs, and backend development with Node.js/NestJS.

Technical Skills

Mobile Development: Flutter (Dart), Kotlin, Android SDK, Bloc/Cubit, Riverpod, Firebase (FCM, Firestore, Analytics), Play Store & App Store Deployment, SDK Development

Payment Terminal & POS Hardware: Multi-OEM Terminal SDKs (HorizonPay, Topwise, Dspread, Morefun), EMV & Contactless Card Processing, Secure PIN Pad Key Injection & Encryption Key Management, Mifare/NFC/CPU Card Reading, Bluetooth & Serial Device Integration, Receipt Printing, TLV Parsing

Backend & APIs: Node.js, NestJS, Express.js, Prisma, RESTful API Design, Database Modeling, Authentication & Authorization (JWT, OAuth2), Role-Based Access Control, Third-Party & Webhook Integrations

Payments & Integrations: Payment Gateways, Account Verification APIs, RRR/Invoice-Based Billing, QR Code Payments, Mifare Card Systems

Cloud & DevOps: AWS, GCP, Docker, Git

Professional Experience

Macrotech Business Solution | Mobile Application Developer / Payment Engineer *May 2025 – Present*

- Built and deployed production-ready mobile applications using Flutter with Bloc/Cubit state management.
- Integrated virtual account creation, payment processing, and user verification APIs for fintech use cases.
- Developed a secure Android POS application (Kotlin & Flutter) supporting POS payments, bank transfers, Mifare card tap-and-pay, invoice generation and receipt printing.
- Architected OctopusTMS, a unified native Android SDK abstracting four POS terminal OEMs — HorizonPay, Topwise, Dspread (terminal & card reader), and Morefun — behind a single API, with runtime device auto-detection, EMV/contactless transaction processing, Mifare/NFC/CPU card reading, QR code payments, PIN pad key injection & encryption key management, and Bluetooth/multi-printer support.
- Integrated Firebase Cloud Messaging (FCM) for real-time push notifications in Macropay, improving user engagement and transaction alerts.
- Led full-stack development for an e-commerce food delivery platform — Flutter frontend + NestJS/Prisma backend (RESTful APIs, order & payment data modeling) — with FCM push notifications for order updates.
- Built the mobile app for Loop, a multitenancy cooperative/microfinance platform (Flutter, Riverpod) — capital, savings, loan and transaction accounts, loan requests with eligibility checks, guarantor requests, and bill payments. Live on Google Play, in review on Apple App Store.
- Led end-to-end development of the LUTH Patient App for Lagos University Teaching Hospital — Flutter (Riverpod) frontend and NestJS backend with RESTful APIs, UHID-based JWT authentication, and RRR invoice/billing logic — covering hospital bill payments via bank transfer and QR/card, and telemedicine access. Currently in store testing.
- Led end-to-end development of the MRA SWzone Estate App (Magodo Residents Association) — Flutter (Riverpod) frontend and NestJS backend with RESTful APIs and role-based access across resident, security, and admin roles — featuring visitor QR tokens, emergency security and ambulance alerts, incident reporting with photo attachments, artisan and property directories, and airtime/data VTU integration. Live on Google Play and Apple App Store.
- Building KeyVend, an estate resident app (Flutter) for Lekki Gardens Phase 2 — in-app wallet with funding/payments, visitor PIN generation and access management, service-charge and levy payments, and smart water-meter token purchases.

Macrotel Innovations | Junior Mobile Application Developer & Backend Developer *2023 – May 2025*

- Developed and maintained mobile applications using Flutter for fintech and consumer platforms.
- Built backend services with Node.js and Express.js, improving API response time by ~20%.
- Contributed to Zippword, a fintech mobile application deployed to both Play Store and App Store, serving 5,000+ active users.
- Contributed to HalalNest, a mobile app helping users locate mosques and access Islamic resources.
- Designed and implemented secure APIs with role-based access control (Admin, Merchant, User).
- Implemented authentication and authorization using JWT and OAuth2.
- Built a Notification-as-a-Service platform delivering SMS, WhatsApp, and email notifications to 5,000+ users.

Marksman Travels & Tours | Junior Web & Mobile Developer (Industrial Training) *2020 – 2022*

- Developed new features for booking and travel management systems.
- Assisted in building mobile applications for travelers.
- Integrated third-party services including payment gateways and booking engines.

Key Projects

OctopusTMS — Unified Multi-OEM POS Terminal SDK

- Native Android/Kotlin SDK abstracting four payment-terminal OEMs — HorizonPay, Topwise, Dspread (POS terminal & card reader), and Morefun — behind a single API, with automatic device detection at runtime.
- Handles EMV/contactless transactions, magstripe/chip/tap and Mifare/NFC/CPU card reading, QR code payments, PIN pad key injection & encryption key management, barcode scanning, and Bluetooth/multi-printer support.
- Shipped with published SDK documentation and an integration guide for consuming applications.

Macropay Mobile App

- Cross-platform fintech app built with Flutter, Cubit state management, and Firebase Cloud Messaging (FCM) for push notifications.
- Integrated virtual accounts, payment processing, and user verification APIs. Published to Google Play Store and Apple App Store.

Nourish Food E-Commerce Platform (Nourished Choice)

- End-to-end development: Flutter frontend + NestJS/Prisma backend — RESTful APIs, relational data modeling for orders/menus/payments, and authentication — with FCM real-time order status notifications.
- Features include user authentication, ordering, and payment processing. Published to Google Play Store and Apple App Store.

Loop — Cooperative & Microfinance App

- Cross-platform Flutter application (Riverpod) supporting multitenancy architecture with isolated tenant data and shared infrastructure.
- Member capital, savings, loan and transaction accounts; loan request flow with eligibility checks; guarantor requests; and bill payments (airtime, data, electricity). Live on Google Play, in review on Apple App Store.

LUTH Patient App

- Led end-to-end development for Lagos University Teaching Hospital: Flutter/Riverpod frontend and a NestJS backend exposing RESTful APIs for UHID-based authentication, RRR invoice generation/lookup, and billing.
- Hospital bill payments via bank transfer and QR/card payment, telemedicine access, and SERVICOM patient support. In store testing.

MRA SWzone Estate App (Magodo Residents Association)

- Led end-to-end development for a residential estate: Flutter/Riverpod frontend and a NestJS backend with role-based APIs across resident, security, and admin roles.
- Visitor QR token generation, emergency security & ambulance alerts, incident reporting with photo attachments, artisan and property directories, construction-site registration, and airtime/data VTU purchases. Live on Google Play and Apple App Store.

KeyVend — Estate Digital Key App

- Flutter app for residents of Lekki Gardens Phase 2 — in-app wallet with fund/pay flows, visitor PIN generation and gate-access management, and service-charge/levy payments.
- Smart water-meter token purchases, dependents management, estate announcements, and support ticketing. In development.

Education

B.Sc. Computer Science — Federal University of Agriculture, Abeokuta | 2019 – 2023 | CGPA: 4.14 / 5.0

OND Computer Science — Ifo College of Management & Technology | 2016 – 2018 | CGPA: 3.28 / 4.0

Professional Development

- SheCodeAfrica – Cloud Engineering Certificate (2021)
- SheCodeAfrica – JavaScript Certificate (2020)
- Web Design & Development Certificate, NBI Institute (2018)
